

SHAHZAIB HASSAN

Senior Software Engineer | Platform Engineering & SRE | DevOps | Backend | Mobile | AI Infrastructure

+92 309 9718473 | shahzaibshah0028@gmail.com | github.com/Shahzaibyy | linkedin.com/in/shahzaib-dev
Islamabad, Pakistan | Transferable Iqama | Former Resident of Al Khobar, Saudi Arabia | Available to relocate to KSA

PROFESSIONAL SUMMARY

Senior Software Engineer with 5 years of experience across platform engineering, site reliability, DevOps, backend, mobile, and frontend — an all-rounder who takes products from architecture to production. Deep expertise in Python and Go backends, Kubernetes/Linux/AWS infrastructure, Flutter mobile apps, and AI infrastructure (LLM/RAG, Voice AI). Delivered systems serving 500K+ concurrent users at 99.95% uptime and led teams shipping production apps to the Google Play Store and Apple App Store for US and Europe-based clients across EST/PST/CET time zones. Transferable Iqama holder with prior Saudi Arabia living experience (Al Khobar), ready to join a KSA-based team.

TECHNICAL EXPERTISE & CORE COMPETENCIES

Languages

Python, Go, Rust, Dart, JavaScript/TypeScript, SQL, Bash

Backend & Distributed Systems

FastAPI, Django, DRF, Flask, Node.js/Express, GraphQL, WebSockets, Microservices, Kafka, RabbitMQ, Celery

Mobile & Frontend

Flutter (Dart), React Native, React.js, Next.js, Tailwind CSS, Firebase (FCM), App Store & Play Store releases

AI Infrastructure

LLM & RAG pipelines (OpenAI GPT-4, Claude API, LangChain, LlamaIndex), Vector DBs (Pinecone, ChromaDB), Voice AI (Twilio, VAPI, n8n), OpenCV, YOLO, TensorFlow, PyTorch

Platform Engineering & Cloud

Linux, Docker, Kubernetes, Terraform (IaC), Nginx, AWS (EC2, ECS, ECR, Lambda, RDS, S3, CloudFront), Azure

DevOps & SRE

CI/CD (GitHub Actions, Jenkins), zero-downtime deployments, high-availability design, incident response & troubleshooting, infrastructure automation

Databases & Caching

PostgreSQL, MongoDB, MySQL, Redis, DynamoDB, Firebase

Leadership & Delivery

Team leadership, architecture & system design, end-to-end MVP delivery, client demos, Agile/Scrum, cross-timezone collaboration (US / Europe / GCC)

PROFESSIONAL EXPERIENCE

DevGate

May 2025 – Present

Senior Software Engineer – Platform Engineering & SRE (Backend, DevOps, Mobile, Frontend)

Islamabad, Pakistan

Full-stack platform owner for multinational clients: design, build, deploy, and operate backend, mobile, frontend, and AI systems end to end.

- Architected Python microservices (FastAPI, Django, Flask) and AI-powered backends serving 500K+ concurrent users at 99.95% uptime, cutting development cycles by 40%
- Led platform engineering and SRE: managed Linux infrastructure, Nginx, and CI/CD (GitHub Actions, Jenkins, Docker, Kubernetes) on AWS; migrated Redis/Celery workers and services from EC2 to AWS ECS, provisioned via Terraform
- Delivered mobile, backend, and frontend as one owner: Flutter and React Native apps, real-time WebSocket APIs, and React dashboards, shipped from requirements through production launch
- Developed LLM-integrated chatbots and RAG pipelines (OpenAI GPT-4, Claude API, LangChain, Pinecone/ChromaDB), automating 85% of customer support workflows
- Built and deployed Voice AI agents (Twilio, VAPI, n8n) for automated order collection, integrated with SaaS dashboards for real-time call analytics
- Partnered directly with multinational clients across the US, Europe, and GCC region, leading cross-functional engineering teams and running client demos across 50+ projects at a 4.8/5.0 satisfaction rating

Develoitsoultions

Jan 2026 – Present

Senior Software Engineer

Remote (US Clients)

- Served as senior engineer for a diverse portfolio of US-based clients, owning delivery from requirements and architecture through deployment
- Collaborated with US stakeholders across time zones in Agile sprints, delivering backend, web, and mobile solutions

OneCode

Sept. 2024 – May 2025

Python Backend & Full-Stack Engineer

Islamabad, Pakistan

- Built REST/GraphQL APIs (Django REST Framework, Node.js) with OAuth2, JWT, and RBAC for US/EU clients, with 85% test coverage
- Optimized PostgreSQL/MongoDB with indexing and Redis caching, improving retrieval speeds by 70%

Global Citech

June 2022 – Aug. 2024

Python & JavaScript Developer

Remote (US Client Projects)

- Built Django backend features for an Arabian food delivery platform (200K+ daily orders), including real-time order tracking

KEY PROJECTS

MyKinn – Social Networking Mobile App (US-Based Client) <i>Flutter, FastAPI, PostgreSQL, Redis, Celery, WebSockets, AWS</i>	2025 – Present
• Led the engineering team and built the full product end to end: Flutter mobile app and production backend; live on both Google Play Store and Apple App Store • Designed a Clean Architecture backend (FastAPI, async SQLAlchemy, PostgreSQL on RDS, Redis, Celery) with real-time chat and calling over WebSockets, and push notifications via Firebase Cloud Messaging • Built face-based profile verification (AWS Rekognition) and a WebP media-compression pipeline (ffmpeg, Celery) that fixed slow feed image loading; automated CI/CD with GitHub Actions and ECR on AWS	
FinTech Core Backend & DevOps Platform <i>Django, Go, Docker, Kubernetes, AWS</i>	2026
• Engineered a secure Django-based fintech backend for transactions and account management, paired with a Go-based DevOps automation layer for CI/CD, infrastructure provisioning, and zero-downtime deployments	
Scientia – Voice AI Order Platform <i>Twilio, VAPI, n8n, FastAPI, React</i>	2025
• Voice AI order-taking platform for a France-based client with n8n automation for CRM updates and escalation routing, plus a SaaS dashboard for live transcripts and analytics	
DroneTrax – Agricultural Drone SaaS Platform <i>Django, FastAPI, React, PostgreSQL</i>	2025
• Built a SaaS platform for agricultural drone operators covering field mapping, crop-health analytics, and flight scheduling, with a Django backend, FastAPI microservices for real-time processing, and a React dashboard	
MyLua – AI Health Chatbot <i>FastAPI, WebSockets, RAG, LangChain</i>	2024
• Built an AI-powered health chatbot with a FastAPI backend and WebSocket-based real-time chat, using a RAG pipeline (LangChain, vector search) for context-aware health guidance and live notifications	
Trash Delivery – Waste Collection Mobile App <i>FastAPI, WebSockets, Redis, React Native</i>	2023
• Built the backend for a trash-collection mobile app enabling real-time pickup requests and driver tracking, using FastAPI, WebSockets, and Redis for live location updates and notifications	
Capstone – Real Estate SaaS Platform <i>Django, PostgreSQL, React</i> (Final Year Project)	2022
• Developed a multi-tenant real estate SaaS application in Django covering property listings, client management, and automated lead workflows for agencies and independent realtors	

EDUCATION & CERTIFICATIONS

COMSATS University Islamabad, Abbottabad Campus	Sep. 2018 – Mar. 2022
<i>Bachelor of Science in Software Engineering</i>	Abbottabad, Pakistan
Certifications	
• Microsoft Certified: Azure DevOps Professional • Microsoft Certified: Azure AI Professional • Machine Learning – Anaconda • Ubuntu Linux Certified
